ANKIT PRAKASH

+91-8235193006 | prakashankit1212@gmail.com | LinkedIn: ankit-prakash | GitHub: prakashankit1212-art

PROFILE

Computer Science Engineering student with hands-on experience in software development, product-oriented application development, UI/UX design, AI/ML solutions, and full-stack web applications. Skilled at translating technical and business requirements into functional software, collaborating across development, QA, product, and design teams, and improving usability, performance, reliability, and maintainability. Interested in Software Project Management, Product Development, CRM Solutions, and business application development.

EDUCATION

B.Tech in Computer Science & Engineering — OP Jindal University 2023 – 2027

CGPA: 7.2

Class 12 (CBSE) — DAV Public School 2023

Class 10 (CBSE) — DAV Public School 2021

TECHNICAL SKILLS

Programming: Python, JavaScript

Software & Web Development: HTML, CSS, Node.js, Responsive Web Development

Backend & Database: Node.js, Python, MongoDB

Product & UI/UX: Figma, Wireframing, User Interface Design, Responsive Design, User-Centric Design

AI/ML: Large Language Models (LLMs), Deep Learning, AI Applications

Tools: Git, GitHub, VS Code

Core Strengths: Software Development, Product Thinking, Application Testing, Debugging, Problem Solving, Team Collaboration, Technical Documentation

EXPERIENCE

Software Engineer Intern — Developerbox Innovation Private Limited, Raipur Jun 2026 – Sep 2026

- Designed, developed, and maintained software applications based on **business and technical requirements**, following modern development practices.
- Collaborated with **Product Management, QA, and Design teams** to support production-ready application development.
- Debugged, tested, and optimized application modules for **performance, reliability, and security**.
- Contributed to code reviews and **technical documentation** within the engineering team.
- Balanced functionality, usability, quality, and technical implementation with a product-development mindset.

UI/UX & Frontend Contributor — Tecno Fest Event Website May 2025 – Dec 2025

- Designed frontend layouts and UI screens for a college-level event website using **Figma, HTML, and CSS**.
- Built responsive interfaces focused on usability, visual consistency, and user experience.
- Collaborated with team members through the development and presentation phases.

PROJECTS

Blood — Full-Stack Web Application

- Developed a full-stack application for managing and organizing **blood donation activities** with integrated frontend, backend, and database functionality.
- Designed responsive, user-friendly interfaces and handled efficient data management for smooth user interaction.

PneumoScan-AI — Deep Learning & Flask

- Developed an **AI-powered chest X-ray pneumonia detection** application using Deep Learning.
- Integrated the trained model with **Flask** to deliver a functional prediction app across model, backend, and user interaction layers.

LLM Projects — Python

- Built Python-based projects with **Large Language Models** and explored LLM-based workflows for intelligent software solutions.

CERTIFICATIONS

- **Deloitte Australia** — Technology Job Simulation, Forage (June 2025)
- **Tata iQ** — GenAI Powered Data Analytics Job Simulation, Forage (July 2025)
- **NPTEL** — Internet of Things (IoT) Certification
